

This letter is in reference to Watertown Tire Recyclers located at W7932 Provimi Road, Watertown, Wisconsin owned and operated by Tom Springer.

Just by driving past Watertown Tire Recyclers it is easy to see that guidelines developed for the proper, safe storage of waste tires is not and has not been followed much less common sense knowledge of fire safety.

Being a resident living in close proximity of Watertown Tire Recyclers should a fire start there is a great concern to me. If there were a fire at Watertown Tire Recyclers it would involve not only the Watertown Fire Department but also those of surrounding communities. It would be a major catastrophe that would involve environment, health and hazardous waste concerns.

Aren't all businesses subjected to regular fire inspections and citations for non-compliance? How is it happening that Watertown Tire Recyclers have not been subject to regular inspections and receiving any citations for non-compliance? If you do not have jurisdiction concerning this matter, who does?

Sincerely

Cindy L. Williams
